

MATADOR NSL

Flat and satchel bag machine

The **MATADOR NSL** is the **ideal machine** for the manufacture of small and medium-sized flat or side gusset bags.

In 1998, GARANT took over the paper bag range from Windmüller & Hölscher, and since then has consistently further developed the flat and side gusset bag machines. Due to modern drive technology and different servomotors, the MATADOR NSL convinces users in the production of small and medium-sized bags.

Due to various innovations such as SERVO-controlled perforation or the patented bottom gluing process, the MATADOR NSL can adapt perfectly to individual production requirements.

Today, the MATADOR NSL can be equipped with various additional devices and therefore used both for the production of conventional flat and side gusset bags and for highly complex window or panoramic bags.

Format ranges for the **MATADOR NSL**

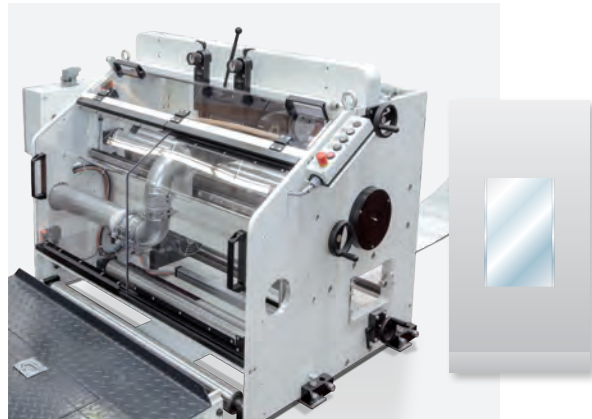

Bag width	2.36–20.08 inch	60–510 mm
Cut-off length	4.13–15.75 inch	105–400 mm
Max. side gusset (open)	5.51 inch	140 mm

Optional additional devices

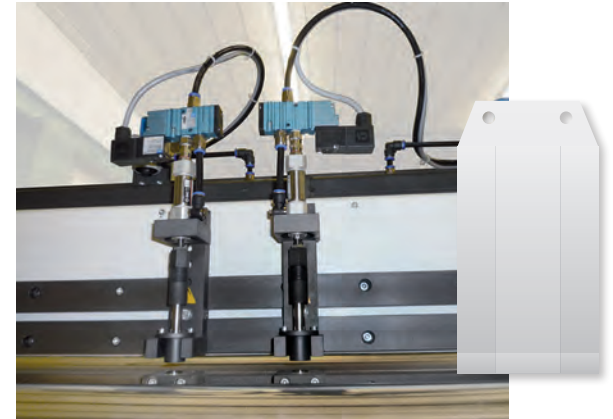

Window unit

SERVO window die cut unit

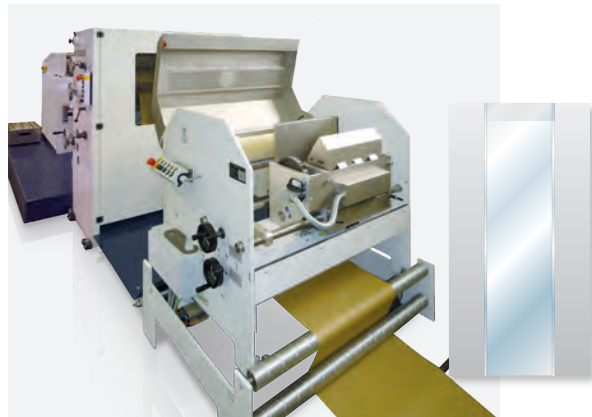

Electro-pneumatic punching unit

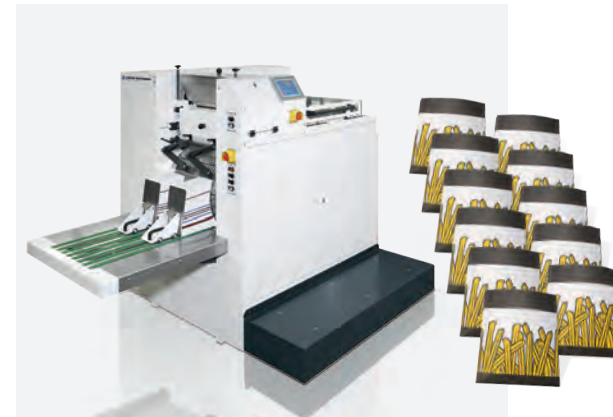

Inline printer LINAFLX NL

Micro-perforation

MATADOR TWIN
