

BASIC TRAINING FOR PAPER BAG MACHINES

The practice-oriented training for the basics of paper bag machines

Why GARANT Basic Training?

This training will provide participants with comprehensive knowledge about the basics of paper bag manufacturing. They will receive an overview of the paper types used for bag production, the adhesives and printing inks used during production.

Further they will learn how paper bags are constructed and which types of bags are suitable for specific uses. The participants will be provided with an overview of the entire machine as well as the functions of the units and subassemblies.

To extend the theoretical training content, the training is supplemented by practical exercises directly on a GARANT machine.

Training content

- ✓ Development of a basic understanding of paper, adhesives, printing inks and paper processing
- ✓ Familiarisation with the structure and properties of paper bags
- ✓ Introduction to the principles of paper bag production
- ✓ Understanding the arrangement and functions of the machine components of a GARANT machine
- ✓ Selecting the right tools and consumables

GARANT TRAINING

In our trainings, you will receive practical training based on a fixed learning concept and with clearly defined learning goals. Through the extensive specialist knowledge and the many years of practical experience of our skilled trainers, you will receive professional product and application knowledge in our trainings.

BASIC TRAINING FOR PAPER BAG MACHINES

The practice-oriented training for the basics of paper bag machines
